

The Lake Harvey Association

The Lake Harvey Association Newsletter | Summer 2017

PRESIDENT'S MESSAGE | Karla Cornelius

The past year has been a good one for our beloved lake. Thanks to the vigilance of our boat monitor "Greeters" and the responsible care and concern of our boaters themselves, our waters remain milfoil free. Thanks also go to Barnet Select Board member Dylan Ford for her advocacy of our lake's continued wellbeing, to the Select Board in its entirety and Town voters as well for their recognition and support of our community's invaluable natural resource.

The past year has been a good one for our Lake Harvey Association as well. Our 2017 membership currently stands at one hundred four. Members are more involved, donating time and dollars toward preservation efforts and our Association celebratory weekend events, and enjoying the multitude of benefits membership offers. Our dedication is great, our sense of connection strong, and the warmth of fun filled summer days and evenings with family and friends awaits and welcomes.

We have together accomplished a great deal. Our Trustees deserve our thanks and recognition:

Jackie Sprague, environmentalist, watches over Lake Harvey waters and shoreline, efforts that benefit lakes throughout the state via her FOVLAP tenure, while fulfilling an array of LHA duties as long time past president and current VP/VIP. She and her husband Sherm (our resident tech advisor) will provide members webcam viewing of our lake year round on our website.

Jan Parsons, our Secretary and Loon Chair, keeps our minutes and safeguards our treasured loons besides.

Dotti Turek, our Treasurer, has thoroughly organized our membership and provides a more detailed and accurate accounting of our finances than ever before, a time consuming undertaking and clearly a labor of love. She also helps with the boat parade, directory and more.

Jan Sherman runs the ever growing Ice Out Contest and Kayak Raffle, assists with the boat parade (and captains our lead LHA boat), tours the lake in search of new members and contributes innumerable and invaluable behind the scenes tasks and services. Her strong ties to the community and years of experience as past LHA president immensely benefit us all.

David Price diligently worked with Barnet Select Board member Dylan Ford to successfully obtain a significant grant serving our mission and lake. And his detailed lake map and directory now available to members only keep us up to date on who's who and who's where.

Steve Adler liaised with the Barnet Select Board and spearheaded the process and subsequent Town voter support for ongoing funding of our vital boat monitoring program, illustrating what can be achieved when we work together toward a common goal.

Robert "Red" Dufresne continues to work long and hard on our behalf on our dam issues. He and his wife Chris have taken over the wonderful Ice Cream Social event created by past Board member Julie Murphy and now enjoyed after the boat parade by young and old alike.

Gail Flynn, our Social Director, expands our membership and enhances our shared experience. Her creative ideas and memorable events such as a great Ice Out Goodbye or bingo party or the Karne Choling farm to table dinner mix fun, fine dining, laughter, friends and neighbors, and bring us all closer together.

Natalie Kitchel brings a younger, proactive voice and energy, launching our new and exciting Facebook page, facebook.com/Lake-Harvey-Association. A "friend"!

Emil Pollak, our newest Trustee, adds an experienced and thoughtful presence to our meetings and Board.

There is of course always more to do. Our website – www.lakeharvey.com - informs our members and welcomes new ones. By adding the ability to pay online, a webcam and map w/directory, more links and items of interest, our site will better meet those needs. And our newly created Facebook page further expands our reach. Visit us there, enjoy and share.

Come to our annual meeting July 8th, 10 – noon, and to our potluck pavilion party Friday evening, July 14th. We look forward to seeing you there.

WELCOME TO SUMMER AT THE LAKE!

A NOTE FROM THE TREASURER | Dotti Turek

Summer is upon us! Our membership stands at 104 households as of June 1st.

I want to thank all of you who responded to either the end of the year mailing or the ice out mailing and sent your membership in already. Annual dues remain at \$25 per household and cover the 2017 calendar year. Just a reminder – the fireworks alone cost us \$3,500, far more than dues can cover. Additional donations for our spectacular fireworks, vital lake preservation projects and whatever else is needed are always welcome, **GREATLY** appreciated and tax deductible.

Also, I remind you that we are offering beautiful Lake Harvey notecards for sale. They are 5 x 7 in size, on a nice heavy card stock and are available in packages of 12 for \$24, or can be purchased individually for \$2.95 at our Barnet stores. If you are interested, feel free to email me directly – dottiturek@myfairpoint.net. Thanks!

THANKS TO ALL THOSE WHOSE GENEROUS CONTRIBUTIONS HELP PRESERVE, PROTECT AND ENHANCE OUR LAKE:

SPECIAL THANKS TO...

Tim VanLeer for his generous donation of a windsurfer, Jan Parsons for her kayak donation for our 2016 raffle, Brady Dindia of A BCD Creative for our newsletter design, Don Easter for his monitoring management, Kathy Wirthwein for her research and reports, Sherm Sprague for his website expertise and all others who have donated their invaluable time.

IN MEMORIAM

Thomas Lowell, 53, passed away on 4/30/17. He and his wife Sandy moved to Barnet from Waterford after their three sons were grown. They planned to build their dream house, and wished it to be on a special property that overlooked a beautiful lake. They found their perfect spot on Roy Mountain Road, high above Harvey's Lake. His family has asked that Memorial contributions be made to our Lake Harvey Association.

GREETER PROGRAM UPDATE | David Price

The boat monitoring program – officially known as the Lake Harvey Public Access Greeter Program – took three major steps forward over the winter season. The Barnet Selectboard agreed to increase the special appropriation request for the program by \$7,000, Barnet voters agreed to include funding for the monitoring program as a line item in the 2018 budget, and the Vermont Department of Environmental Conservation (DEC) awarded the town a \$7,840 Aquatic Nuisance Control grant to help offset the increasing costs of the program and fund certain improvements.

Association trustee Steve Adler appeared before the Barnet Selectboard at its first meeting of 2017. He presented a proposal by the lake association asking the board to [1] incorporate expenditures for the boat monitoring program as a line item in future town budgets and [2] increase funding for the program to \$17,000 to cover the actual costs, which have risen an average of 3.5% per year over the past six years. The board agreed to both requests.

Each year since 2009 Barnet voters have approved a \$10,000 special appropriation to help fund the greeter program. The town administers payroll for the greeters, who are town employees, and pays for electricity to run the power washer used to clean the boats. Mr. Adler, who also serves as town agent, reminded the board that the lake association has always reimbursed the town for expenses in excess of the appropriation. In 2016 the LHA reimbursement exceeded \$6,100.

At the town meeting in March, residents voted to increase the annual funding to \$17,000 and approved including the cost of the program as a line item in future town budgets.

The Aquatic Nuisance Control Grant

In February Selectboard member Dylan Ford and association trustee David Price began work on an application for a DEC Aquatic Nuisance Control (ANC) grant. The grants are administered by Vermont's Watershed Management Division and provide "financial assistance to municipalities and agencies of the state for aquatic invasive and nuisance species management programs." Funding for the grants comes from a portion of the state motorboat registration fees and federal funds. Last year 38 ANC grants were awarded and since 1994 the program has supported more than 67 Vermont municipalities.

The ANC grant awards were announced in early April. The grant money will help the Town of Barnet fund the following elements of the boat monitoring program:

Hiring and training one additional boat greeter to complete the six-person team.

Purchasing and installing a new all-weather boat greeter booth.

Informing those who rent cottages on the lake about the aquatic nuisance risk and the importance of cleaning boats before they enter the lake.

A

History of Success

Of the more than 800 lakes and ponds in Vermont, Lake Harvey ranks 19th in size with a surface area of 351 acres and four miles of shoreline. It is one of the largest lakes in the state to remain free of plant and animal aquatic nuisance species, thanks to one of Vermont's oldest boat access greeter programs and ongoing volunteer efforts.

For the past 13 years the greeter program has successfully prevented any invasive species from entering the lake by boat. Originally implemented and funded by the Lake Harvey Association, the greeter program grew from a part-time volunteer effort into today's six-person team providing coverage 12 hours a day from the weekend before Memorial Day until the weekend after Labor Day.

Over the past seven years, greeters have inspected a total of 5,291 boats, kayaks, and canoes for a per-year average of 756 watercraft. In 2016 greeters worked a total of 1,350 hours to help keep the lake clean. The 2017 grant award and changes in town funding will help preserve a perfect record and prevent the introduction of invasive species for the foreseeable future.

Special thanks to Karla Cornelius, Dylan Ford, Don Easter, Christen Emerson, Ben Heisholt, Jan Sherman, Jackie Sprague, Dotti Turek, and Kathy Wirthwein for providing information used in the ANC grant application.

BOAT PARADE | Don Burke

On Saturday, July 15th around noon, be sure to get out your binoculars, lounge chairs, umbrellas, lake side rafts and docks; then get ready to cheer and/or Boo. Rumor has it that Harvey's Lake will be visited by the forces of good and evil.

Super heroes like Batman, Super Girl, Tom Brady & The Green Mountain Boys will magically appear near the boat launch only to be confronted by the likes of Freddy Krueger, Hannibal Lecter and maybe even Lucifer himself, all of whom may be lurking in the water near the town beach. So if you are into taking sides, be sure to keep an eye out for:

The LHA Annual Boat Parade

Saturday, July 15th [Rain Date: July 16th]

This year's Boat Parade Theme:
Heroes, Heroines & Villains

Come join the fun!! Conjure up a theme that will grab everyone's attention!! Get yourself a boat and decorate it. Then meet us out at the point at:

12:15 p.m. (Non-motorized boats)

1:00 p.m. (Motorized boats)

BOAT PARADE SUMMER 2016 WINNERS

- Grand Prize: Beverly Hillbillies
- 2nd Place: Man on the Moon
- 3rd Place-Tie: The Beach Boys & Moon Landing
- Most Humorous: Ed Sullivan Show
- Most Original: Yellow Submarine
- Best Decorations: Flower Power

BIG thanks for the gift certificates from the West Barnet Quick Stop or Barnet Store given to entrants!

Don Burke has retired as a Board member, but still promotes and organizes our awesome boat parade. He brought it back from the brink of extinction to a roaring success now enjoyed by participants and viewers alike.

We love it, and Don!

BOAT MONITOR REPORT | Kathy Wirthwein

2016 monitoring began Friday May 27 before Memorial Day weekend and was ongoing 7 AM to 7 PM every day until September 12, the Sunday after Labor Day weekend. Then we added Sept 16 and 17, the last weekend days of good weather.

The 2016 836 boat total included 665 visiting groups. 376 of the boats were kayaks brought by about 205 visiting groups. Many kayaks come in pairs or groups up to 5. In 2010 to 2015 we monitored 644 to 851 boats

Among our 665 visiting groups 337 (or about half) were last in Harvey's Lake either this year or last. (We noted 60 of the 336 as last used in Harvey's in 2015, probably an inaccurate number as we do not question or note this consistently.) The least risky visitors also included 92 boats used for the first time in 2016.

Boaters came here from at least 64 different bodies of water. (A few additional boats were from hard to write down out-of-state lakes.) Eight groups came from Lake Champlain, which contains every aquatic nuisance. Seven came from nearby Ticklenaked Pond, which now has milfoil. Other milfoil threats included Willoughby (13), Morey (4), Fairlee (7), Halls Pond (4), Memphremagog (3), Fern Lake (1). The Connecticut River was last used by 14 visitors, Moore Dam by 12, and Marshfield Dam by 9. We need to watch The Connecticut River because it connects various lakes, and rivers flow. The not far trans-Canada Launch contains milfoil, and also some other locations.

This year the List of Vermont water bodies known to have "aquatic invasive species infestations" was updated April 2016. But there are no obvious differences compared to 2015, which I described as showing large increases in various invasive species in my 2015 Annual Report. The Eurasian Watermilfoil infested water body list remains 96 with Lake Champlain locations and Connecticut River locations each counted one time in this total. Water chestnut locations remain at 29 vs. 19 in 2013, and curlyleaf pondweed is still at 37 vs. 30 in 2013.

Lake Champlain has the longest list of invasives, with Spiny Water Flea (a zooplankton which sticks to fish lines and boats) added in 2015. Josh Mulhollem, while visiting in 2015, expressed concern that Zebra Mussels would happily thrive in Lake Harvey if introduced. Fortunately boats are being washed after departing from Lake Champlain at cooperative car washes, and trucks containing boat wash equipment have been added to some on lake locations. The zebra mussels can latch to boats while still **invisible larva**.

Although the increases in invasive species may be stabilized, there have been rapid increases in both numbers and types in the past. And I fear that global warming may cause currently well behaved lifeforms to become problems. So ideally no new species should be added to any lake. Boaters have become increasingly aware and cooperative by washing boats between visits to different bodies of water. I worry about kayaks because they can be dragged out of water over algae (including rock snot?) covered rocks and through mud, which could embed any contamination. And they visit more water bodies than large boats. Rinsing boats after use, allowing 4 to 7 days in the sun, and removing any inside water, if present, is key to safeguarding our lake. Prevention is paramount.

Prevention is the Only Cure! Help us Keep Lake Harvey Pure!

FOVLAP ANNUAL MEETING | Jackie Sprague

The FOVLAP Annual Meeting will be held at the Steak House on the Barre -Montpelier Road on Monday, July 24, 2017. The morning offers a presentation on the Clean Water Initiative Program roadmap toolkit along with FOVLAP business. In the afternoon a panel discussion from local watershed associations presents their work form support and funding through the Leahy Summit. Don't forget the lake association reports and door prizes! We are all very excited about these two terrific and informative events. More information may be found on the FOVLAP website www.vermontlakes.org.

DAM UPDATE | Red Dufrense

The recommended next step is to perform a detailed boundary and topographic survey:

1. A boundary survey will identify and delineate the various land parcels and property owners that will be involved in the project.
2. Will result in a detailed graphic representation of topographic features that will be essential for concept development, project engineering, and permit acquisition.
3. Will resolve longstanding elevational discrepancies that have plagued prior surveys and studies.

A suitable, comprehensive site survey is estimated at \$20,000.

In early May, Dylan Ford will be meeting with the state ANR folks as well as some private and semi-private organizations that may be interested in funding this next step. ANR funding, which derives from EPA grants, may be sparse this year due to the political climate in Washington.

The sediment removal project of 2015 resulted in a restoration of the full width of the spillway. This has lessened the frequency and the severity of, but not fully eliminated, the backflow events.

IDDE ENVIRONMENTAL STUDY

Barnet, Vermont is the beneficiary of a grant from the Vermont Department of Environmental Conservation to complete an Illicit Discharge Detection & Elimination (IDDE) Study. The study will involve conducting an extensive survey of private and municipally-owned stormwater management systems discharging to waters of the State within the community. The purpose of the study is to identify and eliminate potential pollution sources within these drainage systems.

The VT DEC has contracted with Watershed Consulting Associates, LLC, and its subcontractors (the Contractors) to complete this field study during the summer and fall of 2017 and 2018. The Contractors have been authorized by Town officials to field investigate the stormwater management systems, and to conduct water quality testing of effluent within these systems. This will involve the Contractors traversing streams and their tributaries in Barnet. In the case of private property, the Contractors will seek out the property owner, if available, prior to walking the property.

For more information, go to www.lakeharvey.com to the IDDE Study posted under "Environment".

LOON UPDATE AND NOTES

Bill Biddle has seen the regular pair of loons since the week of April 23rd. The nest warning signs have been placed in the channel to prevent boating disturbance that could cause nest failure. Usually nesting is completed by the end of June/early July, with occasional mid-July hatches. The channel nest site is very unusual but works b/c it provides marsh-like habitat and is mostly out of the way of boat and shoreline activity on the main lake, which is very developed and busy.

Water Skiing: When boating fast, just add loons to the list along with kayaks, canoes and swimmers as something to try to avoid. If you see a loon or loon family in a certain part of the lake, just don't boat fast in that area for the next 30 minutes. The lake is plenty big to shift boating activity. Chicks dive less quickly and deep than adults and are harder to see, but even adults can become habituated to boat traffic and not dive. – Eric Hanson

Please, pay attention!

LOON REPORT | Jan Parsons

2016 was another very successful year for the Common Loon population in Vermont. A record number of 91 nests were built with chicks hatching successfully. This exceeded the 87 nests recorded in 2015. There were seven new loon pairs who successfully hatched chicks on five lakes including Caspian Lake and Lake Fairlee. Several other loon pairs built nests but did not successfully hatch chicks on their first attempt.

Much of this new activity is due to the increased number of adult loons coming back to their natal lakes and seeking to establish nesting territories. Because so many lakes and ponds already have nesting pairs, the newcomers are forced to seek nesting territories on unoccupied ponds and lakes. There have been twelve new nesting territories formed in the last three years and 32 since 2008. According to Eric Hanson's article in the Vermont Ecostudies 2016 newsletter, 16 of the new territories are in north central Vermont and seven in far northeast Vermont. Ten pairs have formed on larger lakes where other loon pairs are already established, including Lake Groton and Joe's Pond, and seven other pairs chose ponds smaller than 50 acres which is considered a marginal size to sustain a loon nest. The first year success rate in a new territory is 50% compared to a nest success rate of 78% for established pairs, as observed since 2008.

The Harvey's Lake loon pair successfully hatched a chick in late June of 2016 but the chick disappeared within a few days, almost certainly attacked and killed by an intruder loon. Intruder loons are adult breeding loons which have no territory but are trying to take over territory because they were born and raised on Harvey's Lake or a nearby lake such as Martin's Pond. Loons return three to seven years after fledging and flying to the New England Coast in late Fall of their first year. Harvey's has had six chicks fledge from 2011 through 2015. Martin's pond had about 40 chicks fledge in the 20 years between 1995 and 2014. In 2015 both Martin's Pond chicks disappeared soon after hatching, probably attacked by intruder loons.

Another local predator that has become more of a threat is the bald eagle family which nests nearby along the Connecticut River and is often seen at Harvey's lake perched in a tall pine tree along the lakeshore. Although we lament the loss of chicks to

predators, our mission as Loon monitors and protectors is to help loons avoid human threats such as boat strikes or nest encroachment and provide rescue attempts for loons that are stranded on land, in small ponds too small for take off, or are in danger of being icebound in lakes that are freezing over.

This past December Wendy and Cap Raeder observed a loon in the middle of the lake in open water but without enough room to take off. This loon was probably stopping over at Harvey's on its way to the New England coast. Eric Hanson was notified but the loon was too far from shore and the ice was too thin to attempt a rescue. Fortunately, there was a slight thaw, more water opened up and the loon disappeared with a good chance that it managed to take off in the one hundred foot long "runway" it needed to take flight. Cap Raeder saw it flapping furiously before it disappeared.

By the time you read this newsletter, the loons will probably be nesting in their usual location in the channel leading to the South Peacham Brook. The beaver dams have been dismantled and it will be interesting to see what the water levels are like in the channel this Spring. The Loon nesting warning signs will be in place from early May until the loons hatch their chicks and take them to the main lake, probably in mid to late June. Many thanks to Don and Bonnie Easter and Suzanne Puricelli for taking for of the nest warning signs. Kayaking is off limits in the channel until the loons have finished nesting.

As the planning for a new dam in the channel takes place, it is gratifying to report that a consulting engineer, hired by the Town of Barnet, has asked for information about the loon nesting territory in the channel. We will be meeting with Bob Desrochers, from Fairbanks Mill, as planning and work progress.

Wishing everyone a beautiful summer of enjoyment on Harvey's Lake and continued protection of our loon residents!

Concerned about loons at Harvey's Lake?

Contact Jan Parsons, Loon monitor for Harvey's Lake, at 802-633-2298 or 508-314-0922 (cell).

LAKE HARVEY ASSOCIATION IS NOW ON FACEBOOK! | Natalie Kitchel

We are excited to announce that we are now on Facebook. Please come and like our page! You can find us by typing in facebook.com/Lake-Harvey-Association or simply search for Lake Harvey Association once in Facebook. This is a space that we hope you will find information about the lake, upcoming lake events and photos. We encourage all to share the photographs of your time spent at beautiful Harvey's, as well, as any interesting links or areas of interest. Also, if you have any questions or comments about the lake or area, this is a great space to post them. We look forward to hearing from you and seeing your beautiful photographs!

WATERSKIING ANNOUNCEMENT | Natalie Kitchel

For those interested in learning more about the waterskiing course, we will be holding an informative meeting on Sunday June 18 at 1pm at the lake. We will be teaching people how to drive boats safely and appropriately through, as well as waterski through the course. We are also seeking members who enjoy waterskiing and would like to work together to improve each other's skills and techniques. It's another fun way to enjoy the lake and meet others! All are welcome! If you have any questions or are planning to attend the meeting, please email me at nataliekitchel@gmail.com.

IMPORTANCE OF LAKE HARVEY COMMUNITY | Gail Flynn

Harvey's Lake may be small, but our connections to Harvey are not! Neighbors, friends and acquaintances only add to the richness. Knowing our neighbors and waving as boats go by may seem small, but what would the lake be like without each other? We all have a big common thread that brings us joy.

WHAT TO DO ON A RAINY DAY AT HARVEY'S

Gail Flynn will be offering collage workshops in her studio this summer. No experience necessary!! The cost will be \$10 to cover materials and prep. If you are interested and would like to be notified when they are happening email: gailflynn00@gmail.com, so it will be on file. Please include your email address and phone number. (P.S. A glass of wine may be included depending on the time of the day)

ICE OUT 2017

After an early March temporary thaw, the ice went out belatedly at 5:43 AM on Easter morning, April 16th.

This year's lucky winner was Dotti Turek!
